DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on October 12, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the U.S. patent, 6,601,830 has been reviewed and is NOT accepted.

The person who signed the terminal disclaimer is not recognized as an officer of the assignee, and he/she has not been established as being authorized to act on behalf of the assignee. See MPEP § 324.

An attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c). Furthermore, the Associate Power of Attorney filed on October 12, 2004 is no longer applicable as the practiced has been eliminated.

Claim Objections

Claims 3, 5, 9, 12, 16, 36 and 37 are objected to because of the following informalities:

regarding claims 3, 5, 9, 12, 16, 36 and 37, the status identifier "Previously amended" in line 1 is not an option under CFR 1.121 and therefore should read -- Previously presented--; and,

Application/Control Number: 10/632,394

Art Unit: 3679

regarding claims 3, 5, 9, 12, 16, a claim in dependent form shall contain a reference to a claim <u>previously</u> set forth. Claims 36 and 37, of which claims 3, 5, 9, 12, 16 depend from, are not previously set forth. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 36, 3, 5, 37, 9, 12, and 16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,601,830 in view of Cochrane, British patent GB-2,337,279.

Regarding claim 36, in claims 1 and 10 of U.S. patent 6,601,830, they each lack the limitation "said channel does not receive a reinforcing wire". Cochrane teaches, on page 3 in lines 26-27, a barrier structure without a reinforcing wire thus the channel

does not receive a reinforcing wire. Cochrane states that the invention is intended to cover the barrier structure without receiving a reinforcing wire in the channel such that the barrier structure is optional. Therefore, as taught by Cochrane, it would have been obvious to one of ordinary skill in the art at the time the invention was made to not receive a reinforcing wire in the channel as an option to the barrier structure.

Regarding claim 3, this claim is obvious over claims 1 and 5, as claim 5 teaches arcuate cutouts in the second region.

Regarding claim 5, Cochrane teaches the metal tape having a plurality of first regions, second regions, and third regions and a distance between the barb points of the barbs is equal to a distance between adjacent ones of the second regions of the tape.

Regarding claim 37, applicant has admitted in the remarks, filed on 5/3/04 on page 12 in the second paragraph, that claim 37 is identical to claim 1 of the patent, 6,601,830 except without the limitation in the last line. Cochrane discloses, in Figure 3, the channel describing an arc extending between the flanges, which the arc extends less or equal to approximately 180 degrees.

Regarding claim 9, Cochrane also teaches a width of each of the flanges in each first region is greater than a width of each of the flanges in each second region. A width

of each of the flanges in each third region is greater than a width of each of the flanges in each second region.

Regarding claim 12, Cochrane also teaches a width of each of the flanges in each second region is equal to a width of each of the flanges in each third region.

Regarding claim 16, Cochrane teaches the continuous piece of elongated metal tape having first regions, second regions, and third regions; and a distance between the barb points of the pair of barbs is approximately the same as the distance between adjacent ones of the second regions of the tape.

Response to Arguments

Applicant's arguments with respect to claims 3, 5, 9, 12, 16, 36 and 37 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ernesto Garcia whose telephone number is 703-308-8606. The examiner can normally be reached from 9:30-6:00. The fax phone numbers

Art Unit: 3679

for the organization where this application or proceeding is assigned are 703-872-9326 for regular communications and 703-872-9327 for After Final communications.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on 703-308-2686. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
